HARD SUN (2018)
ETHIOPIA RISING: RED TERROR TO GREEN
REVOLUTION (2015)
FRAIL (2012)

BIOGRAPHY

Emmy Award, RTS Award, Wildscreen Award and Jackson Hole Film Festival Award nominee, David is one of the most prolific and versatile composers in the UK. From the flagship David Attenborough series 'Life In Cold Blood' and 'Life In The Undergrowth', to 'Planet Earth: The Future', the 'Springwatch' theme, 'Mountain Gorilla', 'Grand Designs', the TV adaptation of the highly acclaimed feature film 'African Cats', the feature film 'Frail' starring Simon Shepherd and Catrin Stewart, and more recently '8 Days: To The Moon and Back' and 'Earth From Space' together with co-writer Neil Davidge, with whom David also wrote for the BBC drama series 'Hard Sun'. In addition David scored the beautifully crafted 'Peabody Award' winning documentary film 'Degas and The Dance' and also for the best selling Sony game 'Little Big Planet' narrated by Stephen Fry.

David's scores are continually in demand in the UK and around the world. Whether working with a large orchestra, soloists or groups of indigenous instruments what is important to David is crafting a score that empathetically enhances both images and story, sensing when to augment the on-screen action but more importantly when to give it space.

Inspired by his musical experiences as a choral scholar at Wells Cathedral School and an orchestral percussionist then going on to study jazz and later attending The International Film School Wales, David's early musical compositions led to numerous commissions from the BBC Natural History Unit and subsequently on to becoming highly in demand as an international screen composer.

BBC NATURAL HISTORY
