BEAUTY IN BLACK (2024-26)

TYLER PERRY'S DUPLICITY (2025)

PARISH (2024)

## **BIOGRAPHY**

WOW JONES and JIMI JAMES are shaping sound, story, and style in ways that move people. The LA-based composing duo have delivered one of the strongest scoring streaks in streaming. Their work on "Parish" premiered on AMC in March 2024 and, following its Netflix debut in October 2025, climbed to #3 on Netflix's Top 10 TV Series in the United States. They composed the score for Tyler Perry's "Beauty in Black", whose second season became one of Netflix's most-watched titles worldwide, reaching the #1 overall position on Nielsen's streaming charts with 1.36 billion viewing minutes, as reported by The Hollywood Reporter in March 2026. WOW and JIMI also scored "Tyler Perry's Duplicity", which reached #1 on Amazon Prime, reinforcing their ability to define the sonic identity of global hits. Each project was followed by an official Apple Music soundtrack release, underscoring their range.

They bring an artist-first sensibility to every project, earning a reputation for elevating storylines. Their scores are cinematic and fluid, marked by progressive synths, evocative piano themes, and ambient design, and together, they founded boutique creative agency, Boss Academy.

The Los Angeles-born JIMI is equally skilled as a recording artist and producer. As a performer and songwriter, her music has appeared in "All American", "Queen Sugar", "Kung Fu", "Black Lightning", and "Selling Sunset", while earning millions of streams through her distinct melodies and immersive songwriting. With a background in acting and directing, she creates music with cinematic instinct, emotional depth, and undeniable style. Never one to chase the spotlight, JIMI builds her own. Her album, *Paint The Town*, marks a bold return to her artist era, while her record "Light Lean" has emerged as a standout on the official Netflix *Beauty in Black* playlist, generating over 9,000 Shazams within its first week of release.

Beyond composing, WOW is an award-winning music producer, live music director, sound designer, programmer, and musician whose work has contributed to Pollstar Award-winning tours and live productions for artists including Usher and Post Malone. The Baltimore native is a trusted creative force among top-tier artists and music executives, known for orchestrating major arena productions with precision, adaptability, and high-level musical execution. His work has elevated live entertainment on some of the world's biggest stages, including the GRAMMY Awards, American Music Awards, MTV Awards, Super Bowl broadcasts, and Usher's Past Present Future tour alongside Mike Carson (Kendrick Lamar).
